0 How to Read This Report

Edition status, data labels and conventions

Item	Status
Edition label	WEEKLY EARLY (Edition 2, Thursday-morning refresh) — lines, player props, the official injury page, news and forecasts were re-read early Thursday, Oct 15, 2026. The official report still reflects Wednesday practice. Thursday practice reports, Friday designations, Monday-game reports, roof decisions and game-day inactives are not available yet, so this is not a game-day edition.
Report cutoff	Thu Oct 15, 2026, 5:16 AM ET. Nothing published after this time is reflected.
Last verified	Game lines: Thu 10/15 3:55-3:58 AM ET (7 sportsbooks via SBR) Player props: Thu 10/15 4:07-4:51 AM ET (123 player pages) Injury/practice report and news: Thu 10/15 ~3:57-4:50 AM ET (official report reflects Wednesday practice) Weather: Thu 10/15 4:52-5:16 AM ET (Denver re-checked 5:16 AM; NWS issue times listed per game) Statistics: Wed 10/14 8:19-9:27 PM ET (through Week 5; unchanged)
Season / week	2026 regular season, Week 6 (verified against NFL.com and Pro-Football-Reference schedules) [S1] [S2]
Covered dates	Thu Oct 15 – Mon Oct 19, 2026 (all kickoff times ET)
Completed games	None. As of the cutoff no Week 6 game has been played; all 14 games are upcoming.
Byes	Cincinnati Bengals (3-2), Detroit Lions (3-2), Miami Dolphins (0-5), Minnesota Vikings (5-0)
Previous edition	Wed Oct 14, 2026, 9:31 PM ET (WEEKLY EARLY), from the data files supplied with this request. What changed is listed in 0.2 below.

0.1 Data labels and conventions

Label	Meaning
A VERIFIED STATISTICS	Verified historical statistics (game results, season totals, weekly logs, practice reports, forecasts as issued). Navy table headers.
B SPORTSBOOK LINES & ODDS	Sportsbook lines and odds exactly as displayed, with the book and the time checked. Gold table headers. Prices were read from odds aggregators (SBR for game lines, ScoresAndOdds for props), not from the books' own sites — re-check at the book before relying on any number.
C SOURCED PROJECTION / DERIVED ESTIMATE	Sourced projections (FantasyPros consensus) or reproducible derived numbers (e.g., implied points from spread and total). Slate headers with dashed borders.
ANALYSIS	Analysis: interpretation of the facts above it. Never a pick, stake or prediction of a result.
REPORTED BY NAMED SOURCE	Expected availability or comments reported by a named source (coach, reporter), quoted or paraphrased with attribution.

Status words

- **PENDING** — information that will be released or decided later (designations, roof decisions, inactives, starting quarterbacks).
- **NOT POSTED** — no sportsbook price for that market was displayed by the accessible sources at the check time.
- **N/A — NOT VERIFIED** — the item could not be verified from an accessible, reliable source (left blank rather than estimated).

Conventions

- Practice codes from the official NFL report: **DNP** = did not participate, **Limited** = limited participation, **Full** = full participation. A practice code is not a game designation.
- Odds are American. "O" = over, "U" = under. "ATD" = anytime touchdown scorer; "1st TD" = first touchdown scorer. Book abbreviations: b365 = bet365, DK = DraftKings, FD = FanDuel, MGM = BetMGM, CZR = Caesars, HR = Hard Rock, FAN = Fanatics, BR = BetRivers. "Consensus" is the ScoresAndOdds consensus row (an aggregate, not a book). DFS pick'em apps (PrizePicks, Sleeper, Underdog) are excluded everywhere.
- NY/A = net passing yards per attempt (sack yardage removed). Y/A = rushing yards per carry. I20 / I10 / I5 = plays inside the opponent's 20 / 10 / 5-yard line. Ranks are 1-32; for defenses 1 = fewest allowed (or most sacks/takeaways).
- Retrospective hit counts compare 2026 games already played with *today's* line. They are not a record of past wagers and are not probabilities. Lines ending in .5 cannot push.
- Implied probability from a price includes the bookmaker's margin (both sides add up to more than 100%).
- Source markers like [\[S14\]](#) link to the source register in Section 11 (title, link, retrieval time ET).

0.2 Changes since previous edition

Compared with the Wed Oct 14, 9:31 PM ET edition. Line and price comparisons are computed in code from the two editions' stored reads of the same aggregator pages; they describe what each read displayed, not when a book moved. Statistics through Week 5 are unchanged unless listed.

News, roster and data corrections

A VERIFIED STATISTICS		
Team / item	Change	Source
HOU / ARI	Trade not reflected in the previous edition: Houston acquired WR Marvin Harrison Jr. from Arizona (reported 10/10, announced 10/11). Harrison now appears in the Houston sections; ScoresAndOdds lists Houston markets for him.	[S31] [S32] [S33]
TB	Added the team's injury detail and timeline for Baker Mayfield: dislocated right thumb in Week 3; Bowles (9/28): "a minimum of three weeks"; no surgery or IR expected.	[S28] [S29]
CHI	Added ESPN's Grade 2 hamstring description for Caleb Williams, HC Ben Johnson's 10/12 non-commitment, and the backups (Tyson Bagent started in his absence; Case Keenum).	[S30] [S35]
NYG	Added context: the Giants acquired QB J.J. McCarthy from Minnesota on 9/28; Harbaugh confirmed Winston as the starter that day.	[S33] [S34]
NO (stats)	Corrected Kendre Miller's season receiving line to the weekly-source sum (4 rec, 6 tgt, 15 yds); the previous edition showed only Week 4.	[S11]
SEA / GB (stats)	Documented a one-attempt source difference in rushing attempts for Sam Darnold and Jordan Love (yards agree).	[S5] [S11]
Responsible gambling	Helpline standardized to the National Problem Gambling Helpline, 1-800-MY-RESET (1-800-697-3738), per NCPG.	[S27]

- **BAL - Lamar Jackson (ankle): did not practice Wednesday.** Status **PENDING**. Tyler Huntley started Week 5 (24/32, 201 yds, 2 TD). [\[S14\]](#) [\[S15\]](#)
- **TB - Baker Mayfield (dislocated right thumb, Week 3): did not practice.** HC Todd Bowles said 9/28: "Right now we're probably talking a minimum of three weeks." Rookie Jalon Daniels started Weeks 4-5 and Bowles said 10/9 he plans to keep starting him; NFL Network's Mike Garafolo reported Mayfield appeared unlikely to play. [\[S14\]](#) [\[S28\]](#) [\[S17\]](#)
- **CHI - Caleb Williams (Grade 2 hamstring strain per ESPN): full practice Wednesday** after missing Weeks 3-5. HC Ben Johnson (10/12): "No determination has been made in terms of what direction we're going." NFL Network's Ian Rapoport (10/12): "all signs point" to him playing. Tyson Bagent started in his absence; Case Keenum is the other backup. Not yet confirmed. [\[S14\]](#) [\[S16\]](#) [\[S30\]](#)
- **HOU - roster change: Houston acquired WR Marvin Harrison Jr. from Arizona** (reported 10/10 by ESPN's Adam Schefter and NFL Network's Ian Rapoport; announced 10/11). He had 5 catches for 85 yards and 1 TD in four games for Arizona and is not on Houston's Wednesday report. [\[S31\]](#) [\[S32\]](#)
- **NYG - Jaxson Dart (knee) is out for the regular season** per the Giants; Jameis Winston has started Weeks 3-5. The Giants acquired J.J. McCarthy from Minnesota on 9/28, and Harbaugh confirmed Winston as the starter that day. [\[S18\]](#) [\[S33\]](#) [\[S34\]](#)
- **WAS - Jayden Daniels** returned in Week 5 (17/25, 199 yds; 9-103-2 rushing). First official Week 6 report due Thursday. [\[S11\]](#) [\[S14\]](#)
- **Thursday final report (SEA at DEN):** SEA RB Zach Charbonnet OUT (knee), LB Chazz Surratt OUT, LB Drake Thomas OUT; DEN CB Pat Surtain II OUT (ankle), S Talanoa Hufanga OUT (ankle), CB Riley Moss QUESTIONABLE (ribs). [\[S14\]](#)

Players gaining or losing opportunities

ANALYSIS

- Based only on Wednesday participation - none of these absences is confirmed for game day.
- SEA: with Charbonnet OUT, Emanuel Wilson (21 and 20 carries in Weeks 4-5) and George Holani are the backs on the report.
- HOU: Montgomery DNP - Woody Marks took 15 carries in Week 5. NYJ: Hall DNP - Braelon Allen ran 24 times for 116 yards in Week 5.
- TEN: Pollard DNP - Tyjae Spears (limited) caught 9 passes in Week 5. ARI: Love DNP - Tyler Allgeier has 35 carries and 12 catches.
- PHI and CLE: both top running backs did not practice; fallback roles are **N/A — NOT VERIFIED** in this edition.
- CHI: a Caleb Williams return would change the context for receivers whose Weeks 3-5 came with Tyson Bagent at quarterback.
- HOU: Marvin Harrison Jr. joins a receiver group led by Nico Collins (limited Wednesday), Xavier Hutchinson and Dalton Schultz; how targets are shared is not established in accessible data. ARI loses a receiver who had 5 catches in four games.
- Receiver absences (NO Olave, IND Keenan Allen, KC Rice, LAC Harris, TB Godwin, PHI Smith) could redistribute targets to teammates listed in Section 4.

Pace and likely game script

Offensive pace: **N/A — NOT VERIFIED**. Script notes below use posted lines and season stats only.

ANALYSIS

- The posted market (SEA -2.5, total 40.5) points to a close game with the third-lowest total of the week.
- Seattle's defense leads the league in yards allowed per game (251.2), net yards per pass attempt (4.5) and takeaways (11); Denver's offense ranks 30th in yards per game (269.0). On paper that favors a field-position, low-volume game script for Denver's passing attack.
- Seattle's run game (Emanuel Wilson 21 and 20 carries in Weeks 4-5) meets a Denver run defense allowing 145.2 rush yards per game (29th) and 4.7 yards per carry (25th).

What could change the expected script

ANALYSIS

- *Denver secondary: Pat Surtain II (CB) and Talanoa Hufanga (S) are OUT and Riley Moss (CB) is QUESTIONABLE; a thinner secondary could change how Seattle attacks through the air.*
- *Turnovers: Sam Darnold has 5 interceptions on 98 attempts; Seattle's defense has 11 takeaways.*
- *Weather is not expected to be a major factor (low 50s at kickoff, falling into the 40s; light north wind), but morning rain is forecast in Denver.*

ANALYSIS

- Market: LAR -12.5 at six books (largest spread of the week; Fanatics -11.5), total 51.5 (BetRivers 52).
- The Rams lead the NFL in net passing yards per game (307.6). Arizona allows 7.9 net yards per pass attempt (32nd) and 32.4 points per game (32nd).
- A lopsided score is one scenario the spread implies; that would affect late-game volume for both offenses (analysis, not a forecast).

Pace and likely game script

Offensive pace: **N/A — NOT VERIFIED**. Script notes below use posted lines and season stats only.

ANALYSIS

- Market: GB -1.5, total 52.5-53.5 (second-highest).
- Dallas' defense allows 395.4 yds/G (31st), 168.4 rush yds/G (32nd) and 7.8 net yards per attempt (31st) with 2 takeaways and 0 interceptions.
- Green Bay's run game averages 60.4 yds/G (32nd), so the matchup on the ground pits the league's lowest-volume rushing offense against its most generous run defense.

- WAS run defense (faces SF): 95.4 rush yds/G (8th), 3.9 per carry (11th), 3 rushing TDs allowed.
- Game-script risk: SF is favored by 7.5; a lopsided score could shift carries toward SF late and passes toward WAS.

6 Touchdown Odds Hub

Passing-TD lines, anytime and first touchdown scorer prices, usage behind them

A | VERIFIED STATISTICS

- **What the scorer markets settle on:** standard anytime / first touchdown scorer markets concern the player *scoring* a touchdown (in possession of the ball in the end zone), not throwing one. DraftKings' NFL TD page states: "Passing touchdowns do not count." [S25]
- **Exceptions and voids:** DraftKings' filed house rules (general section) void bets on a selection that does not participate, unless a market is labelled "all-in" / "run or not". Overtime treatment for NFL player props sits in the football-specific rules, which were not reachable - **N/A — NOT VERIFIED**. Rules differ by sportsbook and state; check the book's rules before relying on any settlement assumption. [S26]
- **Passing, rushing and receiving touchdowns are kept separate below:** passing-TD over/unders (6.1); scorer markets with each player's rushing vs. receiving TDs (6.2). Separate rushing-TD-only or receiving-TD-only markets: **NOT POSTED** as displayed. Two-or-more-TD markets: **N/A — NOT VERIFIED** (not displayed by accessible sources).

ANALYSIS

- *Variability: a first-TD market requires one specific event (that player scoring the game's first touchdown), so outcomes are far more dispersed than anytime markets; multiple-TD markets compound that further. Long prices reflect that dispersion plus the bookmaker margin.*
- *Implied probability from any price below includes the bookmaker's margin; summed across all scorer options it exceeds 100%.*

Touchdown-market gaps and exclusions

- Players whose pages showed TD-scorer prices but no sportsbook yardage markets (often status-dependent): A.J. Brown, Aaron Rodgers, Braelon Allen, DJ Moore, Denzel Boston, Harold Fannin Jr., Jalon Daniels, Kenyon Sadiq, Ladd McConkey, Lamar Jackson, Makai Lemon, Quinshon Judkins, Saquon Barkley, Travis Kelce, TreVeyon Henderson.
- Not captured in this edition: D'Andre Swift (CHI) - no player prop page found, Dallas Goedert (PHI) - no page found, Dontayvion Wicks (PHI), Terry McLaurin / Stefon Diggs (WAS) - no page found, Deebo Samuel (SF), Khalil Shakir (BUF), Tyler Huntley (BAL), Jalen Coker (CAR) - page still showed Week 4, Tre' Harris (LAC) - page still showed Week 5.
- Excluded as display errors: anytime-TD cells whose sign disagreed with every other book (13 Hard Rock cells, e.g. negative prices for plus-money players) and three single-book outliers noted on the player rows.

NWS text forecast (same issuance): Thursday - rain likely, mainly before noon (60%); high near 54; north wind 10-20 mph, gusts as high as 31 mph. Thursday Night - mostly clear, low around 31; north wind around 6 mph becoming calm in the evening; gusts as high as 15 mph. [\[S23\]](#) [Forecast link](#)

ANALYSIS

- *Kickoff conditions (low 50s, falling to the mid-40s; north wind 3-6 mph) are not extreme for passing or kicking. The NWS forecast had not been re-issued since Wednesday afternoon at the re-check - refresh before kickoff.*
- *Rain is forecast mainly before noon local time; NWS shows 0% precipitation chance from 6 PM MDT. A damp surface early is possible but not forecast as a factor.*
- *Altitude is a recognized Denver factor for kicking distance; no numerical adjustment is applied here.*

Met Office hourly table for Sunday: 1-6 PM 12-13 C (feels like 10-11 C), wind 9 mph, gusts 21-27 mph, chance of precipitation 40-50%. Daily summary for Sun 18: "Sunny intervals", max 13 C, min 9 C. Wind direction not captured. [S24] [Forecast link](#)

ANALYSIS

- A 40-50% chance of precipitation is a probability of any precipitation at the location, not an amount; the Met Office daily symbol is "sunny intervals".
- If showers occur, ball security and footing can be affected; precipitation does not automatically mean a lower-scoring game.
- Sustained wind 9 mph with gusts of 23-27 mph (direction not captured): gusts in that range can affect kicking and deep throws; no numerical adjustment is applied.

8 Injuries and Expected Role Changes

Official practice participation, designations, named-source reports and inactive status – kept separate

- **Practice participation** (DNP / Limited / Full) is from the official NFL Week 6 report as displayed on NFL.com, re-read Thu 10/15 ~4:00 AM ET in team groups (the report still reflects Wednesday practice). Players marked **new** were listed at this read but not captured in the previous edition. [S14]
- **Official designations** exist only for the Thursday game (final report). Sunday-game designations are released Friday and Monday-game reports begin Thursday: **PENDING**.
- **Named-source expectations** (coaches, reporters) and **secondary-source labels** (the SBR article published 3:12 PM ET, which assigned status words before any official Sunday designations existed) are shown separately and are not official. [S19]
- **Confirmed inactives** are released about 90 minutes before each kickoff: **PENDING** for every game. Nothing in this section is a game-day inactive list.
- Body parts were not displayed for Sunday-game players on NFL.com at retrieval; where shown, they come from the cited source.

REPORTED BY NAMED SOURCE

HOU: ROSTER CHANGE: Houston acquired WR Marvin Harrison Jr. from Arizona (deal reported 10/10 by ESPN's Adam Schefter and NFL Network's Ian Rapoport; announced 10/11). Per the AP, Houston received Harrison and a 2027 seventh-round pick; Arizona received 2027 second- and sixth-round picks. Harrison had 5 catches for 85 yards and 1 TD in four games with Arizona and was inactive for Arizona in Week 5 while the deal was finalized. He is not on Houston's Wednesday report. (AP (David Brandt) 10/11; KOLD 10/10; SI trade tracker)

ANALYSIS

Potential workload and matchup effects

- HOU: Montgomery DNP would leave more work to Woody Marks; Nico Collins and Dalton Schultz were limited; LT/RT Trent Brown DNP; edge rushers Anderson Jr., Clowney and Hall limited.*
- HOU roster: newly acquired WR Marvin Harrison Jr. is not on the report; how Houston splits targets with him is not established.*
- JAX: four cornerbacks on the report (Montaric Brown DNP; Lewis, Jarrian Jones and Jaylon Jones limited) - depth matters against Houston's passing game.*

REPORTED BY NAMED SOURCE

CHI: Caleb Williams: Grade 2 hamstring strain (ESPN, 10/12). Returned to practice limited Fri 10/9; FULL participant Wed 10/14. HC Ben Johnson (10/12): "No determination has been made in terms of what direction we're going." NFL Network's Ian Rapoport (10/12): "all signs point" to Williams playing. Tyson Bagent started in his absence; Case Keenum is the other backup. Status: expected return, not confirmed. (ESPN (Courtney Cronin) via ABC7, 10/12 10:09 PM; NBC Sports note 10/12; NFL.com report)

ATL: Michael Penix Jr. was a FULL participant Wednesday (secondary sources list ribs; he sat out overtime in Week 5). Penix has started Weeks 3-5. (NFL.com report; SBR injury article 10/14 3:12 PM)

ANALYSIS

Potential workload and matchup effects

- *QB scenario:* Caleb Williams practiced fully; if he were unable to play, Chicago's options are Tyson Bagent (started in his absence) and Case Keenum (ESPN, 10/12); HC Ben Johnson had not named a plan.
- *CHI:* Monangai DNP concentrates the backfield on D'Andre Swift; linebackers Edwards and Elliott and edge Odeyingbo DNP.
- *ATL:* Penix full practice; CB C.J. Henderson DNP.

9 Odds, Recent Results and Projections

All-book game lines, prop quote registers, retrospective results and sourced projections – visually separated

- **A. Verified historical statistics** (navy) · **B. Sportsbook lines and odds** (gold) · **C. Sourced or derived projections** (slate, dashed border).
- Prices are compared only at identical lines. Opening-to-current movement is **not shown**: the aggregator's "opener" column has no verified timestamp.
- Implied probability = $100 / (\text{odds} + 100)$ for plus prices and $|\text{odds}| / (|\text{odds}| + 100)$ for minus prices. It **includes the bookmaker's margin**, so the two sides sum to more than 100%.
- Model probabilities, fair odds and expected value are **not shown**: no defensible probability model was built for this edition. Hit counts are never converted into probabilities.
- All odds were read from aggregator pages (SBR for game lines, re-read Thu 10/15 3:55-3:58 AM ET; ScoresAndOdds player pages for props, re-read Thu 10/15 4:07-4:51 AM ET). Up to seven sportsbooks are compared for game lines and up to eight for props. Quotes seen at only one sportsbook are labelled **single-book**.

All quotes as displayed on ScoresAndOdds player pages [S22], checked Thu 10/15 4:07-4:51 AM ET. Prices are compared only at identical lines. The props board (S21) still showed Wednesday's values and is not used as a quote source (see 11.2). Single-book = only one sportsbook displayed a passing-yards line for that player.

9.3 Skill-player primary-market quote register

B | SPORTSBOOK LINES & ODDS

One primary market per player (rushing yards for running backs, receiving yards for receivers and tight ends; receptions or rushing + receiving yards when the primary market is not posted). Each row gives the bet365 quote and the lowest and highest lines displayed by any sportsbook, with the book named. Every book's quote is in Sections 4-5.

DraftKings BUF moneyline	-258 / +210 (Wed 9:09 PM and Thu 3:57 AM)	Same value as DK BAL-CLE	Shown with a flag; verify at DraftKings.
DraftKings WAS-SF spread	WAS +5.5 / SF -5.5	Six other books: 7.5	Shown with a flag; median uses all books (7.5).
BetRivers spreads (4 games)	Pick'em or moneyline-like values	Other books show normal spreads	Excluded as anomalous (HOU-JAX, CHI-ATL, NYJ-NE, WAS-SF).
Official injury page lists	Wed 8:20 PM read: e.g., 18 PHI players	Thu ~4:00 AM read: 24 PHI players (30 additions league-wide)	Thursday read used; additions marked "new" (page has no timestamps).
London hourly precipitation	Wed read: 2 PM 50%, 3 PM 40%	Thu read: 2 PM 40%, 3 PM 50%	Thursday read used; both within the 40-50% band.
Denver hourly wind direction (same 12:47 PM MDT issuance)	Wed read: 8-10 PM MDT N, N, NW	Thu reads (4:55 and 5:16 AM ET): NW, W, W	Thursday reads used (consistent twice); the issuance did not change, so the difference is in reading the table, not a new forecast.
Injury status words	SBR article: e.g., Lamb, Jeanty, Coker "Questionable"	Official report: full practice; no Sunday designations yet	Official report preferred; SBR labels shown as not official.
Jaxon Smith-Njigba	RotoWire note (10/13): limited, ankle	Official final TNF report: full, no designation	Official report used.
FantasyPros scoring label	Half-PPR (title, prior read)	Standard (label at Thu re-check)	Fantasy points omitted; raw stats only.

11.3 Access limitations

- Direct sportsbook odds pages (BetMGM, bet365, DraftKings, FanDuel, Caesars, Fanatics, BetRivers, Hard Rock) were not accessible in this research environment; all prices come from aggregator displays (S20-S22) and must be re-checked at the book.
- The research workspace cannot reach data sites directly (GitHub-hosted datasets, ESPN, PFR and Weather.gov were refused from the shell); every page was read through a web-reading tool, which summarizes tables. Wide tables were re-read in structured form and cross-checked where possible.
- Alternate-line ladders (passing, receiving, rushing), 2+ touchdown markets, separate rushing/receiving-TD markets and team-total markets were not displayed by the accessible sources.

- Snap share, route participation and Next Gen Stats pressure data were not accessible (FantasyPros snap-count page returned no rows in the prior edition; Next Gen Stats not accessed).
- Offensive pace (plays per game / seconds per play): TeamRankings returned an error and the PFR team-offense table did not load in the prior edition.
- Player prop pages were not found for D'Andre Swift, Dallas Goedert, Dontayvion Wicks, Terry McLaurin, Stefon Diggs, Deebo Samuel, Khalil Shakir and Tyler Huntley; Jalen Coker's and Tre' Harris's pages still showed earlier weeks.
- Weather.gov API (api.weather.gov) is not used; NWS forecast pages were read instead. The Denver and Santa Clara NWS forecasts had not been re-issued since Wednesday afternoon at the re-check.

11.4 Labels used

- **NOT POSTED** - no sportsbook price displayed by accessible sources at the check time.
- **PENDING** - awaiting a scheduled release or decision (designations, inactives, roof, starters).
- **N/A — NOT VERIFIED** - could not be verified from an accessible, reliable source; left unfilled.

11.5 Accuracy checks performed

- Coverage: 14 games / 28 teams cross-checked against NFL.com and PFR Week 6 schedules and the SBR odds screen; 4 bye teams (CIN, DET, MIA, MIN). No game completed as of the cutoff.
- Every prop page read was checked to show this week's matchup before its quotes were used (two pages showing earlier weeks were rejected).
- Standings and points for/against reconciled to PFR game-by-game results for all 32 teams; defensive yards allowed reconciled to PFR opponent totals.
- Weekly player logs summed and checked against PFR season totals; the remaining differences are listed in 11.2.
- Derived numbers (medians, implied points, implied probabilities, per-game averages, ranks, retrospective counts) were computed in code from the stored figures.
- Every quote carries its retrieval time; data cutoffs (ET, Thu 10/15): lines 3:55-3:58 AM, props 4:07-4:51 AM, injury page ~4:00 AM, news to ~5:00 AM, weather 4:52-5:16 AM; stats through Week 5 (Wed 10/14 reads).
- Every page was rendered and inspected for clipping and overlap before delivery.

12 Edition Notes

Delivery, design and responsible-gambling information

- **Edition:** WEEKLY EARLY (Edition 2, Thursday-morning refresh). The label reflects what was verified: Wednesday practice reports, the final SEA-DEN report, and lines, props and forecasts re-read early Thursday. A GAME-DAY UPDATE would add Friday designations, roof decisions and refreshed lines; a GAME-DAY FINAL would add inactives.
- **Changes since previous edition:** listed in Section 0.2 (previous edition: Wednesday 10/14, data cutoff 9:31 PM ET).
- **Design:** SPORTS.PICKS1024 text wordmark (no logo supplied); navy, black, white and metallic gold; data-type chips and header colours separate facts (A), sportsbook quotes (B) and projections/estimates (C); wide tables are split rather than shrunk.
- **Navigation:** the contents page and source markers are tappable; PDF bookmarks list every section and game.
- **Audience use:** factual research only. No betting recommendations, stakes, parlays or "locks" are originated. No user-supplied selections were provided for this edition.
